Letter no C 203-19928/11/42

C 203-21841/12/42

C 203-20721/12/42

Recommending sanction of the circumstances, etc.
to an Govt grant of Rs 3340 for towards the
estimated cost of subsidiary pumping arrangement
at Kolar town

From The D. C. Kolar Dh

No A5- C-106/4243 & 8-12-42

States that two estimates have been
prepared (1) for Rs 3340 for the subsidiary
pumping arrangements for the Kolar water
supply and (2) for Rs 2100 for the
continuance of the flocculator arrangement
on a permanent basis for the purification
of the water supplied to Kolar Town and
recommending sanction in the circumstances,
explained that the entire cost of the
former work amounting to Rs 3340
may be met by Govt out of the W S Grant
during the current year and that the bill
would be asked to meet the cost of the latter
work amounting to Rs 2100 out of the provision
of Rs 2000 made in the budget of the year for
the improvement of water supply

The P. U. D. which is self explanatory
showing the urgent and real necessity for
the work is for kind perusal

1) The works appear to have been taken up pending sanction to the estimates on account of the extreme urgency and necessity. The Mldy is not in a position to bear the cost of Rs 3360 for the former work and the entire sum is recommended to be borne from out of the W.S. Grant for the current. The recommendation may perhaps be upheld in the circumstances stated.

3) As regards the latter work the continuance of the flocculator arrangements meant for the purification of water it may be stated that it was tried as an experimental measure and a grant of Rs 970 was also sanctioned therefor in G.O. of 19/11/41. A revised estimate for Rs 1300 was also received for this work and an addl grant of Rs 330 has also been sanctioned recently from out of the W.S. Grant for the current year up to now. This work was of an experimental nature. As this has been found to be successful it is proposed to continue this arrangement on a permanent basis. The cost required for this work during the current year would be Rs 2100. The D.C. has stated that the mil. Comal would be asked to meet this cost out of the provision in the budget for the improvement of water supply. Subd for orders with a draft for sanctioning.

Letter No 721 dated November 12, 1942 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the President, Town Municipal Council, Kolar

Re Necessity for digging new wells and cleaning existing wells for water supply purposes in Kolar Town

In continuation of this office letter No 513 dated 11th November 1942 forwarding an estimate amounting to Rs 3,340/- for arranging subsidiary pumping from Ammerahalli tank for water supply to Kolar Town, I have the honour to inform you that it is likely that even the subsidiary pumping arrangements may fail on account of lack of underground water supplies in the Ammerahalli tank. Since we are now starting with an empty tank and all the water that is necessary for the supply of Kolar town, may not be available from Ammerahalli tank underground supplies, I wish to suggest to you that sufficient publication should be given to the townspeople in Kolar Town for digging new wells and for cleaning up the existing wells, restricting the water supply available from the pumping station for purely drinking purposes. I request you to kindly take immediate action in this direction, so that the town may not suddenly be put into difficulty. The Assistant Engineer, No 5 Sanitary Sub Division, Bethamangala, is requested to meet you and give necessary assistance in this matter.

To

The Deputy Commissioner,
Kolar District, Kolar

Sir,

Urgent necessity for starting subsidiary pumping in
Kolar Town

With reference to the estimate for Rs 3,340/- for subsidiary pumping arrangement for Kolar town countersigned by the Kolar Town Municipal Council, I have the honour to state that there is very little time to lose and immediate arrangements have to be made for starting the subsidiary pumping in order that the Kolar Town may not have to be without water. The Sanitary Engineer is this day permitted to make immediate arrangements and incur necessary expenditure in this connection pending receipt of funds. I request you to be so good as to arrange for placing the necessary funds at the disposal of the Bureau of Sanitary Engineering immediately.

I have the honour to be,

Sir,

Your most obedient servant,

Ed P Parthasarathy
Director of Public Health

Letter No 689 dated 25/26th November 1942 from the
Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore,
to the Director of Public Health in Mysore

Re Urgent necessity for starting subsidiary pumping
in Kolar Town-

I have the honour to state that an estimate for Rs 3,340/-
for subsidiary pumping arrangement for Kolar Town is received
duly countersigned by the Municipal President. No funds
have yet been placed at the disposal of the Sanitary Bureau.
In the meantime, there is very little time to lose and
immediate arrangements have to be made to start subsidiary
pumping if the Kolar Town should not go without water.
The Municipal President and the Deputy Commissioner are
being written to separately to immediately place the neces-
sary funds at my disposal. Under the circumstances I
request permission to make immediate arrangements for the
same and incur necessary expenditure pending receipt of
funds.

Subject - Subsidiary Pumping arrangements and Improvements to
the Kolar Water Works at an estimated cost of Rs 3340/-
and Rs 2100/- respectively

I have the honour to forward herewith the extracts of the resolution
of the Town Municipal Council, Kolar dated 18th November 1942 relating to
the above subject and to state as follows -

The Sanitary Engineer, Bureau of Sanitary Engineering in his letter
dated 11th November 1942 addressed to the President, Town Municipal Council
Kolar, has stated that due to the failure of rains, tank level of Ammerahally
which is the only source of water supply to Kolar Town is only ~~1 foot~~
~~1 foot~~ 1 foot and 8 inches above the sill level of the sluice and no further
heavy tank filling rains can be expected till May next and that, since the
present available water in the tank will suffice till the end of December
1942 only, even with the restricted supply, it is necessary that subsi-
diary arrangements have to be completed before then. He has also request
the President of the Local Municipality to countersign the estimate for
Rs 3340/- and return it with necessary funds to start the work immediately.

Government in their order No L 4165-67/11 155-40-6 dated 19/11/1941
sanctioned an outright grant of Rs 970/- for the installation of an experi-
mental flocculator to reduce the turbidity of Ammerahally tank water and
the use of sulphate or alumina and country alum. The work was started in
November 1941. The Sanitary Engineer in his letter dated 14th November
addressed to the President of the local municipality has stated that the
experiment was tried for six months and the results were found to be quite
satisfactory. It is stated that after this experiment, the resultant tur-
bidity after filtration was reduced and there is a considerable improvement
in the quality of water. He has also stated that the experimental stage
now over and for the last six months, the flocculator work is being con-

p t o

continued and that it is proposed to keep permanently at Kolar all the machinery and materials that were got temporarily for this work on loan from various sources. For this purpose an estimate for Rs 2100/- is prepared and sent to the President of the Municipality for countersignature and return along with necessary funds to continue the flocculator work on permanent basis.

Both these estimates have been considered by the Municipal Council at their meeting held on 18th November 1942 and the Council have resolved that the estimates may be countersigned and Government requested to meet the entire cost of the works from water supply grant. The President of the Municipality has reported that having regard to the present financial condition of the Municipality it is not possible to meet any portion of the cost of these works from Municipal funds and has requested sanction as a special case for an out right grant of Rs 5440/- for these two works.

The present financial condition of the Municipality is not sound and it is not in a position to meet the entire cost of these two works. Having regard to the great importance and urgency of the work with the subsidiary pumping arrangements, I recommend a full grant of Rs 3340/- for subsidiary pumping arrangements and request you to be so good as to obtain early orders of Government to sanction an out right grant of Rs 3340/- from Water Supply grants for the year 1942-43.

There is a provision of Rs 2000/- in the current years Budget of the Municipality under "E 9 WATER SUPPLY" and the Municipal Council will be asked to meet the entire cost of the other work viz, Improvement to Kolar Water Works by continuing flocculator work on permanent basis from this head.

Early orders of Government may kindly be obtained.

I have the honour to be,
Sir,
Your most obedient servant,

for Deputy Commissioner,
Kolar District.

Copy of letter No 715 dated 11 11 42 from the Sanitary Engineer Bureau of Sanitary Engineering, Bangalore to the President Town Municipal Council, Kolar.

Regarding Subsidiary pumping arrangements for Kolar water works - No 3340/-

In continuation with this office letter No. 220 dated 13th August 1942 regarding the above stating that the Superintendent A & F Water works, Bethanangal was requested to ration the water supply to Kolar Town, consequent on the low levels of Ammerahallu tank and that arrangements are made to resort to Subsidiary pumping operations, I have the honour to state that due to the complete failure of the regular expected rains, the tanks level on 8th November 1942 was only 1.1'-8" above the sill level of the sluice. Since no further heavy tank filling rains can be expected till at least the beginning of May next and since the present available supply will hold out only till the end of December even with the restricted supply, it is very necessary that the subsidiary pumping arrangements have to be completed before then. I enclose herewith for favour of your immediate countersignature and return with funds an estimate for Rs 3340/- for the above work.

Since the matter is extremely urgent, I request your immediate compliance in the matter. The works can be arranged soon after receipt of the countersigned estimate from you and funds are arranged.

Subsidiary Pumping in Kolar Town

In continuation of this office letter No C 203-21 dated 4th December 1942 sending a copy of this office letter No C 203-20 dated 2nd December 1942 addressed to the Deputy Commissioner, Kolar regarding the starting of the subsidiary pumping in Kolar Town, I have the honor to inform that the President, Municipal Council, Kolar intimates in his No H C 66/42-43 dated 7th December 1942 that the Council is not in a position to pay the estimated cost of Rs 3340/- for the work and that an appeal has therefore been made to the Deputy Commissioner for recommending to Government for the sanction of an outright grant of Rs 3340 for this important work in view of the financial stringency of the Council. A copy of the letter with a copy of the resolution of the Municipal Council in this behalf is enclosed for the information of Government.

I request you to be so good as to obtain and convey sanction of Government to the grant of Rs 3340/- for the above work as it is very important and urgent, out of the Town Improvement Grants during the current year.

I have the honour to be,
Sir,

W

CC letter No 66/42-43 dated 7-12-42 from the President,
Town Municipal Council,olar, to the Director of Public Health
in Mysore, Bangalore

With reference to your letter No 203-23 dated 4-12-42
requesting to arrange for funds being placed at the disposal
of the Bureau of Sanitary Engineering immediately for starting
the subsidiary pumping work inolar Town, I write to state
that the Municipal Council is not in a position to pay the
estimated cost of Rs 3340 for the above work in their present
financial stringency Hence an appeal has been submitted to
the Deputy Commissioner in this office letter No 66/42-43
dated 19-11-42 for recommending to Government for the sanction
of an outright grant of Rs 3340/- for this important work in
view of the financial stringency of the Council Though the
work is of great importance the Council is unable to meet any
portion of the estimated cost It is very kind of you for
having instructed the Sanitary Engineer to take up the work
immediately

I shall feel highly obliged if you will kindly recommend
to Government for the sanction of a grant of Rs 3340/- from
the Town Improvement Fund The Deputy Commissioner has also
made a recommendation to Government for the grant of the
estimated amount

A copy of the resolution of the Council passed in this
Council is herein enclosed for kind perusal
